EXPERIENCE

Front End Developer

Workable Web Solutions

- Developed and optimized responsive websites for small businesses, enhancing user experience across all devices.
- Collaborated with clients to design modern, intuitive websites that aligned with their business goals.
- Leveraged React and modern front-end technologies to build dynamic, interactive websites with fast load times and high performance.

Web Developer

Chesapeake & Palmetto

- Developed and launched a responsive website for Gordy's Restaurant, enhancing user experience and increasing online reservations by 25% within the first month.
- Optimized website performance, reducing load times by 50% and improving mobile traffic by 35%.
- Integrated a user-friendly content management system, enabling staff to easily update menus and promotions, saving an estimated 5 hours per week in administrative tasks.

PROJECTS

DayZero [🔗](#)

Journaling and Mood Tracking

- Developed a goal-tracking and mood-monitoring system for DayZero, allowing users to track progress and reflect on personal growth in real time.
- Built a mood tracking feature that let users log and analyze emotional states alongside their goals, improving consistency in goal achievement.
- Designed a streamlined interface for goal management and journaling, making it easier for users to track progress and stay organized.

Hues [🔗](#)

Quick Palette Generation for Web Apps

- Developed a fast and responsive color palette generator, allowing users to create, refine, and save custom palettes with real-time previews.
- Implemented dynamic color manipulation features, including hue adjustments, shade locking, and algorithmic palette generation.
- Optimized the UI/UX for seamless interaction, ensuring smooth transitions, intuitive controls, and an efficient workflow for designers.

EDUCATION

Scrimba Web Developer Bootcamp [🔗](#)

- Built and deployed multiple full-stack projects during the bootcamp through hands-on experience.
- Participated in collaborative coding challenges and peer reviews, enhancing teamwork skills and receiving positive feedback for problem-solving and code quality from instructors and peers.

SKILLS

Languages

JavaScript, Typescript, Python, Rust

Frameworks

NextJS, React, GraphQL, NodeJS, TailwindCSS, Prisma, DrizzleORM, MongoDB, Postgres, Jest, Cypress
